| **Topic** | : | Intellectual Property : Know Your Rights |
| **Details of Speaker** | : | Dr. Sunita Dhotre, Associate Professor, Bharati Vidyapeeth (DU) College of Engineering, Pune |
| **Date** | : | 18/12/2021 |
| **Timing** | : | 9:30 a.m. |

**Proceedings** :

Dr. Sunita Dhotre explained what actually Intellectual Property Rights are? She expressed clearly the need of knowing our rights related to the intellectual work done by us & getting financial benefits of the same in this competitive world. Then she dealt with the different forms of intellectual property rights. She told students how to differentiate between the different types of intellectual property rights & choose the one suitable for our work. She explained students about the validity of the different intellectual property rights which we are getting.

She gave the information about the copyrights in detail as students attending the session were doing the graduation of Computer Science. She gave many examples related to the copyrights. She explored the intellectual property rights opportunities in the areas of Data Science, Blockchain Technology, and Linux Kernel.

In this session students understood the importance of intellectual property rights, its registration process, how actually it is useful and what they should have do to register their own patent. Dr. Sunita Dhotre inspired students by her message "Think – Create - Inspire, Let's take India higher"

Total 173 students attended the session & got benefitted. This session will definitely help students in near future.

**Glimpses of the session:**
