Report of Ideathon competition

Ideathon competition was taken to motivate students to come up with some product/ service for their business. The different topics/ areas with details were as given below.

1) **Contactless Student attendance system:** Build an app or online platform which can keep track and maintain contactless attendance of students.

2) **Share learning experiences:** Build an app or online platform which programming students can use to capture their work-based experiences and share these learning experiences with other students through text, photos, or videos. The focus should be to develop a platform that allows programming students to share their work experiences and projects with other younger students.

3) **Improved Medical and Emergency Communication:** An app can immediately connect medical staff to their emergency contact, immediately informing them if there's an emergency situation.

Two rounds were conducted for this competition. During the first round basic idea was to be presented in front of the judges.

During the second round detailed proposed solution was to be proposed.

Total 15 teams (30 students) participated & faculty of various streams of engineering attended this session. The feedback from the participants was taken. The session was very much helpful to students.

Prof. Mrs, Sharmila Karpe, Anjali Deshpande, Mrs. Rashmi Dixit, Mrs. Anupama Budhewar took efforts for this event.

The event was judged by Mr. Vikrant Shelke, Infosys Ltd. Pune

Screen shots: Considering the Covid-19 situation, the competition was conducted in online mode.
