## Institution's Innovation Council

### Report of Self Driven Activity

Date: 12/05/2023

Day & Date : Friday & 12/05/2023

Venue : Remote Centre Hall

Event : National Level Competition on Innovative Solutions to Problems - Innoverse

#### **Proceedings :**

A National Level Competition related to innovative ideas was arranged as a part of National Level Technical Symposium –WITCHAR-2023. The purpose of the event was to provide a platform to the students to display their technical prowess & encourage generation of new thoughts and help these thoughts find expression.

The topics given for problem solving were related to Software & / or Hardware Solution for Environmental/ Climate change, Health & Fitness, Social Media, Internship/ Job Selection Compatibility, smart crop mapping, Mobile phone screen time & content moderation for children etc. Around 20 themes were given for finding the solution. Students presented the solutions to these problems. The event was conducted separately for the branches Computer Science & Engineering & Allied branches, Civil Engineering, Electronics & Allied branches, & Mechanical Engineering.

Judges from Industry & Academia evaluated the solutions. Suggestions were given to the students to improve the solutions. Students were motivated by the judges to take these solutions further to bring a product or service into the market. Students were guided to have the solutions which are commercially viable along with technical feasibility.

About 125 students participated in the competition. Prizes were given to the teams presenting best solutions to the problems.
