

Walchand Institute of Technology, Solapur

Institution's Innovation Council

Report of Self Driven Activity

Date: 26/08/2023

Day & Date : Saturday & 26/08/2023

Venue : Conference Hall (Civil-Mech Building)

Speaker : Dr. Abhinandan Patil

(Associate Professor, D.Y. Patil College, Kolhapur, Cancer Scientist, Research Scientist, International Educator, Youtuber, Blogger, Psychologist, Motivational speaker).

Topic : Startup

Initially Dr. Patil talked about the success of Chandrayan 3 Mission. Then he talked about the failure of Chandrayaan-2 mission in 2019. He said that we should learn from our failures. He further said that failure is one of the steps in business. He gave examples of few countries where banks are sanctioning loans easily for those businessmen who are having failure experience. He then talked about the expenses done for Chandrayaan-3. He compared the expenses with probable expenses of those of other countries for the same mission. He then said that the Indian industries in sectors such as telecommunications, remote sensing, and satellite navigation will get benefitted from the success of Chandrayaan-3.

He then told the difference between business & startup. He then explained the various qualities required to start a startup. Then he talked about starting our own startup. He then talked about various opportunities available for startups. He appreciated the efforts from governments to promote the startups. He talked about the various emerging areas like AI, Machine Learning, Data Science & the corresponding opportunities. He also discussed the role of AI in accurately predicting the lunar surface, locating the obstacles, and descending safely. Lastly, he discussed about the importance of patents in startups.

More than 350 students & faculty members got benefitted from this session.
